PROJECTS

Real Estate Management System | Full-Stack Project **2025 – 2026**

- Developed and maintained a full-stack web application using Java, Spring Boot, React.js and PostgreSQL, implementing features across the frontend and backend.
- Built and integrated 5+ RESTful API endpoints connecting backend services to the PostgreSQL database; implemented database-backed CRUD operations using client-server architecture principles.
- Troubleshot software bugs and technical issues; validated API requests and responses with Postman and tested features manually.
- Maintained Git/GitHub version control and technical documentation throughout development.

Portfolio Web Application | Frontend Project **2026**

- Built a responsive portfolio website from scratch using HTML5, CSS3 and JavaScript.
- Incorporated 3D UI design elements to create a visually engaging, interactive portfolio experience.
- Used Git and GitHub to manage the project and independently explored improvements to the application.
